Advanced Remanufacturing Program

A comprehensive aircraft remanufacturing program integrating major maintenance, structural and systems inspection, component renewal, modernization, applicable engineering improvements and mission-specific completion.

Technical specification

The program includes the applicable:

- ABC heavy inspection
- Fresh Phase 1 through Phase 6 maintenance
- Landing gear overhaul

Collins 65 autopilot

Where legally and operationally applicable, it supports lower crew workload and efficient single-pilot cargo operations.

Price and delivery terms on request.

The exact technical inclusions can be finalized with EVAS.
